Our Speakers

Ts. PW. Siew, Founder and Director of Seikou Group, is a dedicated technology enthusiast with a passion for KNX. With 26 years of expertise, he serves as the KNX National Group SEA President, driving innovation and excellence in the field of home and building automation. He holds an MBA from University of Gloucestershire, UK

Mr. Lum Chan Khin, General Manager of Seikou Systec Sdn. Bhd, overseeing operations and KNX project management. With 30 years of expertise in HV, LV, ELV Systems, and KNX Partner since 2002. He has left an indelible mark in the electrical industry, contributing to many prestigious commercial projects. His engineering prowess is recognized with registration as a Graduate Engineer by the Board of Engineers (BEM).

Ms. Alexandria Liew, General Manager of GreenControls Technology SDN BHD, boasts 7 years of expertise in Industrial, Home & Building Automation. Spearheading operations and business development in SEA, she passionately collaborates with partners and integrators, offering captivating smart building solutions to elevate and enrich the value of every building. Her journey began with a bachelor's degree in Biomedical Electronics Engineering.

Mr. Rajanikanth Urs, Director and SMB Sales Leader at HPE Aruba Networking, overseeing product management, business intelligence, marketing, and sales. With over 20 years of IT industry experience, he has played key roles in product strategy, cross-functional collaboration, and customer engagement. He holds an MBA from the University of Mysore and a bachelor's degree from Bangalore University.

Mr. Philip Tang, Regional Manager for SEA, India, and Oceania at HMS Industrial Networks, with over 20 years of experience in Industrial and Building Automation. With a background in Electronics & Electrical Engineering and a specialist diploma in Energy Efficiency and Management, he collaborates with partners and system integrators, delivering seamless Intesis KNX solutions for transformative home and building automation.
